

Safe, Reliable Public Access.

Make a school, house of worship, or business more friendly for people with limited mobility with a Bruno commercial vertical platform lift (VPL). Bruno's commercial VPL offers an affordable, space-saving solution for ADA compliance. Made in America.

Easy to Use. Self-lowering ramp folds down for smooth roll on/off access and automatically folds up when VPL is in use to create a safety barrier. Pressure-control rocker switch provides easy up/down operation.

Safe. Unit shuts down when obstruction is touched under the platform. Emergency stop and audio/visual alarm. Top/bottom limit switches and upper/lower final limit safety switches.

Indoor or Outdoor. Weather-protected controls and powder-coated paint to protect the VPL.

Code-Compliant. Designed in accordance with ASME A18.1, section 2 and can be used in most applications to meet ANSI A117.1 National Accessibility Guidelines. Verify that local codes allow for an unenclosed wheelchair lift solution.

Model Heights
Access up to 53"

Lifting Capacity
750 lbs (340 kg)

Warranty
2-Year Limited
